## Projects

### Pendora e-Commerce

April 2025 – April 2025

Pendora is a full-stack e-commerce app that enables users to browse and search for products easily, filter items by category, price, or rating, add them to their cart or wishlist, manage addresses, and view detailed product information.

[Live Demo](#) [Github repo](#)

### LinkUp Events Management

March 2025 – March 2025

The Linkup App is a MERN stack project that helps users discover online and offline events with easy search and filter options. Users can view event details like date, location, and organiser with just a click.

### Workasana

May 2025 – June 2025

Workasana is a task management app built with React and Express + MongoDB, featuring secure JWT authentication. It enables users to create, filter, and manage tasks organised by teams and projects.

The app supports URL-based filtering and protected routes for authenticated task management. Charts and reports (via Chart.js) provide insights into completed and pending work.
